### **RESEARCH STATEMENT**

As an active member of the UNC Lineberger Comprehensive Cancer Center and UNC School of Nursing, my program of research focuses on addressing issues to improve cancer care with a focus on survivorship issues. This includes health services research using large data sets to evaluate the quality of cancer care and intervention studies to facilitate the transition from active treatment into survivorship. I collaborate with a number of other multidisciplinary researchers on related projects. I mentor a number of nursing and other professional students in cancer research as well as junior faculty from the School of Nursing Faculty, School of Medicine and School of Public Health. My current efforts are as Interim Director of the Office of Cancer Survivorship at the National Cancer Institute where I strategically advise the Division of Cancer Control and Prevention and National Cancer Institute on intra- and extramural opportunities and national funding priorities for survivorship research.

### **TEACHING STATEMENT**

My focus is on preparing the next generation of adult gerontology nurse practitioners with an oncology focus, oncology nurse scientists and other interested clinicians about cancer care regardless of type of preparation using innovative student-centered methods.

### **SERVICE and ENGAGEMENT STATEMENT**

I provide ongoing service and leadership at the School of Nursing, University and UNC Lineberger Comprehensive Cancer Center and external community. I am also committed to providing service locally, regionally, nationally and internationally focusing on improving cancer care and cancer survivorship activities. As a result, I am actively engaged in leadership activities with the Oncology Nursing Society, American Society of Clinical Oncology, American Association for Cancer Research, American Cancer Society and the National Cancer Institute regarding survivorship issues.
